

You can configure your iPhone to access Eduroam with the CAT Configurator.

- 1) Connect to the site <http://cat.eduroam.org> and click on marked button to continue: Make sure you select **Institut National des Langues** and click on the button to open The download page.

On the download page, the button should change automatically with the version you currently use:

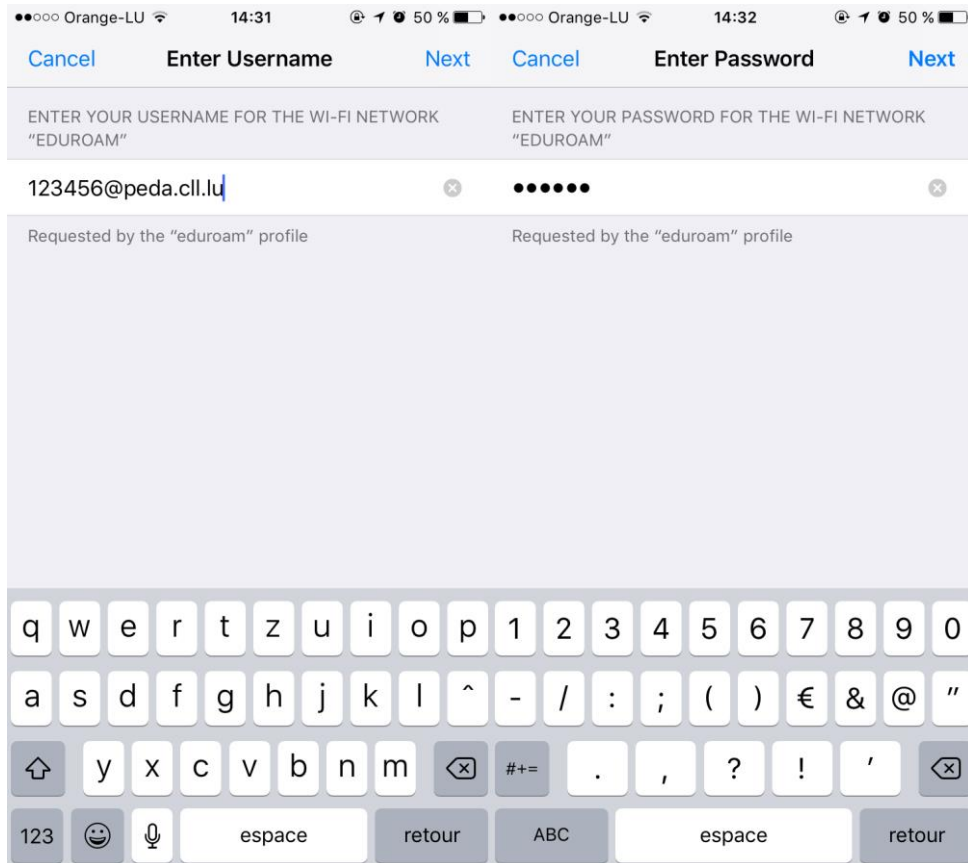

- 2) After downloading the installer, click on Install and enter your iPhone passcode if you have one:

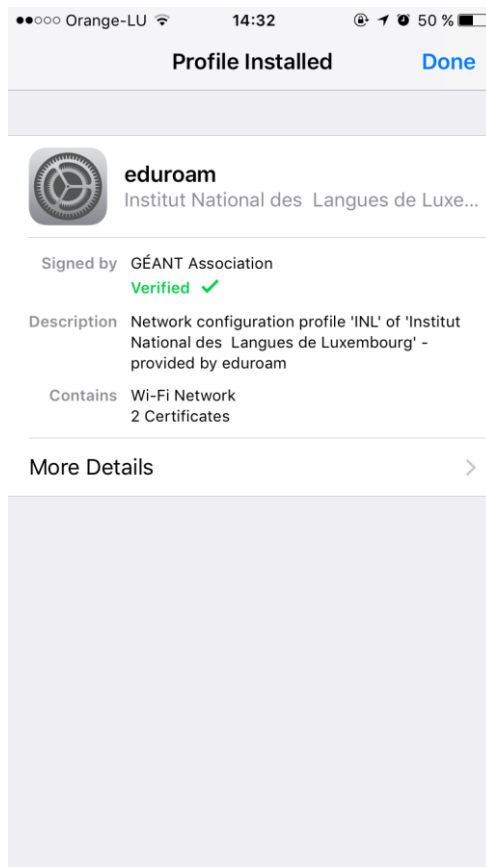

- 3) Note that you need to input “[@peda.cll.lu](mailto:123456@peda.cll.lu)” behind your identification number as “Username”.

For this example, the identification number “123456” is used.

Tab next and enter you INL account password.

4) After you entered your INL credentials click Done to finish the installation.

Congratulations! At this point you successfully configured your device for Eduroam.
